Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 5, 9, 13, 17 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Avery, U.S. Patent 6,611,883, hereinafter Avery.
3. Referring to claims 1, 5, 9, 13, 17 and 19, Avery teaches a direct memory access (DMA) process in figures 6A and 6B. When a PCI page address matches a valid PCI base address range in the PCI segment map, the segment map maps the PCI address to an entry in the InfiniBand address map. In particular, the address map returns a pointer to a work queue pair that contains the data segment size that will be used in the DMA transfer (compiling a queue-pair-number map, wherein the map associates unique queue pair numbers with services hosted by network nodes). For example, the selected entry in the address map might be associated with an RDMA work queue pair. A work queue entry is created in that queue for processing the RDMA request (looking up the queue pair number associated to the requested service). If the matching address is found, the process proceeds to where the R-Key for the selected region is obtained from the InfiniBand address map entry (replying with the address of the node hosting the requested service and the queue pair number associated with the requested service) (column 10, lines 7-32).

Allowable Subject Matter

4. Claims 2-4, 6-8, 10-12, 14-16 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
